SOLUTIONS

- Trustworthy Security Solutions brand

LANDWELL's business scope encompasses the information technology industry, science and technology equipment industry, and strategic sectors outlined in the 12th Five-Year Plan, including aerospace, new energy, Internet of Things, energy efficiency, and environmental protection.

The cornerstone of many products lies in the core components of RFID mobile automatic identification technology, which find wide-ranging applications across various domestic industries such as government, petroleum and petrochemicals, security systems, public safety, telecommunications, power utilities, rail transportation, storage and logistics management, water resource management, environmental protection, military installations, hazardous materials handling, property management, and hospitality sector.

LANDWELL plays a pivotal role in China's automation industry, offering essential support for national economic development and urban infrastructure projects.

Headquartered in Beijing, LANDWELL operates branches and offices in 19 cities across mainland China, including Shanghai, Shenzhen, Hangzhou, Nanjing, Xi'an, Chengdu, Changsha, Yantai, Shenyang, and Xinjiang. These operations are supported by 2 R&D centers and 1 software center.

LANDWELL's diverse range of products are exported to over 150 countries and regions worldwide, including the USA, Germany, UK, France, Russia, Japan, Brazil, Singapore, South Africa, Poland, Korea, and many more.

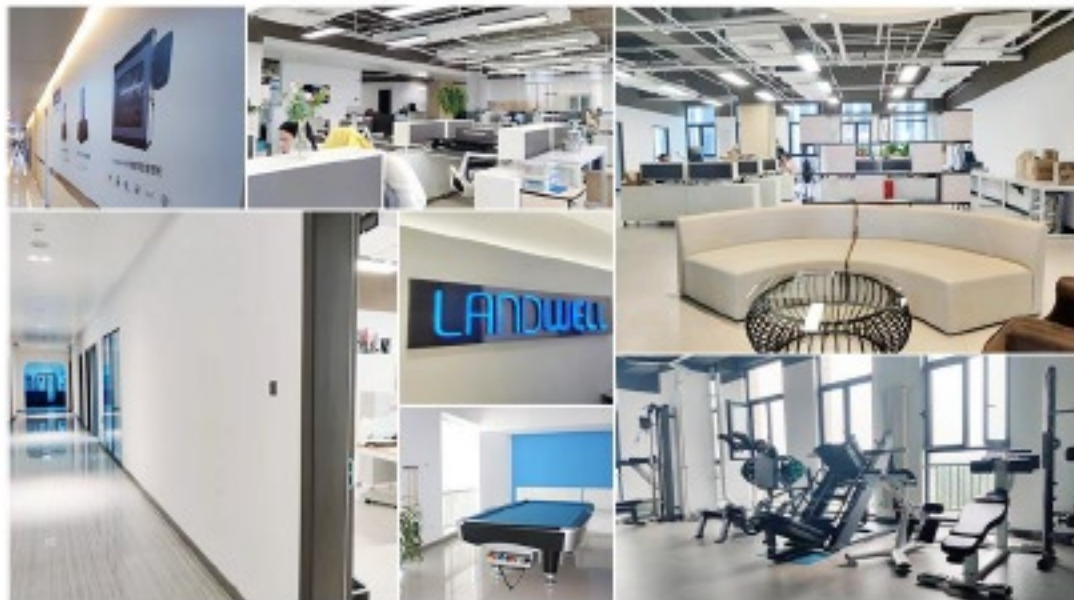

With a global presence, our partners span across the globe, contributing to our widespread reach and success.

BEIJING: Head Office

Beijing serves as the central hub of operations for LANDWELL, hosting the company's factory, offices, and headquarters. Within our Beijing headquarters, we have established a dedicated software development center, a design team, production and assembly facilities, testing teams, as well as sales and after-sales support. Through our comprehensive platform, we ensure the delivery of top-quality products and exceptional services to our customers.

At LANDWELL, we are unwavering in our pursuit of excellence. Our core values revolve around a steadfast commitment to quality, continuous innovation, and utmost customer satisfaction. If you are seeking a trustworthy supplier of premium products, we stand ready to meet your needs and exceed your expectations.

YANTAI: Industrial Research Center

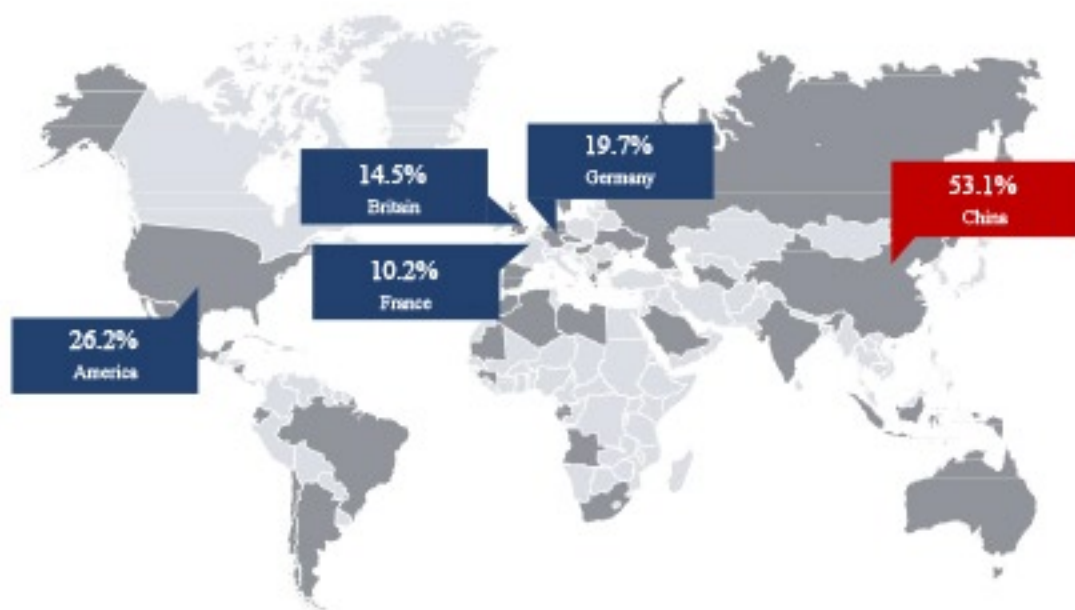

Landwell Yantai is a company nestled in the picturesque coastal city of Yantai. In 2018, we acquired a 4,000 square meter office building to establish our research and production center for electronic patrol systems and intelligent key cabinets.

Our mission is to offer our clients cutting-edge and effective solutions that elevate their security measures and streamline their workflows. Backed by a team of seasoned engineers and designers, we are dedicated to furnishing top-tier products that cater to the ever-changing demands of our clientele. At Landwell, we are dedicated to pushing the boundaries of technology and innovation, shaping a safer and more interconnected world for all.

SUMMARIZE

The smart key management system provides secure and efficient key management solutions for various industries. Through intelligent technology, it easily tracks and controls key usage, enhancing security, reducing time, and costs. Whether in hotels, healthcare facilities, educational institutions, or corporate offices, smart key cabinets effectively streamline management processes, making your work more convenient and reliable. Additionally, the system effortlessly helps users track key borrowing situations, including who took or returned which key and when, improving work efficiency and lowering management costs. This system aids in managing the crucial assets you control—keys, offering a more comprehensive and secure management solution for your business.

Guard Tour Patrol, LANDWELL

LANDWELL is listed as the drafting unit of "National Industry Standard for Electronic Inspection" !

KEY CABINET CLOUD SOFTWARE

Original graphical software interface design

Tree management structure services:
Infinitely extendable downward management departments to maximize user management needs.

Powerful background analysis service:
It can process and analyze the uploaded key retrieval and return records in real time, and provide the required reports to the manager at the first time.

Setting up navigation services:
One-stop navigation setup service, just click "Next" to complete successfully.

Convenient mobile APP push service:
Statistical reports and comparison results can be actively pushed to the manager's cell phone at regular intervals according to user requirements.

Intelligent statistical reporting services:
Daily, weekly and monthly reports, the assessment time can be accurate to hours, minutes and seconds to meet the summary needs of different users.

GUARD TOUR PATROL SOFTWARE

The software interface is simple,
user-friendly and powerful
